

Take the following steps to install TensorFlow in an Anaconda environment:

1. Follow the instructions on the [Anaconda download site](#) to download and install Anaconda.
2. Open Anaconda Prompt and Run the following commands:
 - **conda create --name tensorflow python=3.5** (Create a conda environment named tensorflow)
 - **activate tensorflow** (Activate the tensorflow conda environment)
 - **conda install jupyter**
 - **conda install scipy**
 - **pip install tensorflow** or **pip install tensorflow-gpu**
